Experience

BASF Metals Limited, Market Analyst and Operations Coordinator — London, UK, Oct 2022 – Dec 2025

- Received an award for the creation and automation of the Autocat market mapping tool, streamlining data collection across multiple departments and significantly enhancing the efficiency and reliability of market overviews to support strategic decision-making
- Maintaining and improving the existing suite of market data models, developing a strong understanding of model assumptions and contributing to optimisation initiatives
- Proposed detailed market insights and analysis of current trends and news flows to 2 Global PGM Supply and Demand reports
- Developed and refined import and export trade data models, delivering crucial insights that directly support strategic planning and market positioning, particularly in the context of evolving tariff conditions

- Played a pivotal role in preparing Verdium for customer readiness, designing and implementing Excel macros to automate confirmation processes for both the London and US teams, reducing manual efforts
- Designed and implemented the reconciliation process for Verdium accounts, ensuring accurate financial alignment and full legal compliance
- Leveraged Excel macros to optimise workflows across 30+ operational documents, reducing turnaround time by 90%
- Verified and confirmed trade data in the Trinity trading system with strong attention to detail, resolving discrepancies in real time to mitigate operational and financial risks
- Cleared daily metal commitments for London and Zurich, preventing market defaults, and reconciled metal positions with financial institutions, instructing movements on pool accounts
- Collaborated closely with trading and commercial teams to meet operational requirements and resolve queries promptly

The College of Richard Collyer, Data Entry Assistant — Horsham, UK
Aug 2019 – Oct 2022

- Enrolled and customized timetables for over 1,000 students, accommodating individual needs while ensuring accuracy and compliance with requirements
- Efficiently managed large quantities of data while maintaining strict confidentiality of sensitive information
- Led collaborative efforts to train new staff, showcasing excellent communication and leadership skills
